## Here are some more special requests we have had lately:

Don't have a hand edger in store?

We are happy to re-size lenses for a perfect fit!

We are receiving a few of these requests in our lab: "Replacement lenses for clip-ons". We are able to fit polarised brown and grey lenses to your customers clip-ons. This includes the clip-ons that don't have a closing block!

Our frame care lab has an endless supply of high index AR coat clear Plano lenses. Have frame merchandise on display with no lenses? Send them in and we will fit them with these crystal clear demo lenses to make them look visually stunning for sales and ease to mark up for multi focal measurements. We can replace RX lens for your patient that has just had cataract surgery so that their glasses remain cosmetically appealing.

**If you have any special requests regarding lenses, please give us a call for a chat about what we can offer.**

**Thank you for reading**
